INDEX OF AUTHORS

The Index of Authors contains the names of all authors of original contributions to the Journal. The various types of contribution are distinguished by the use of the following superscripts inserted after the appropriate page number:

P = Papers (original); R = Review articles; C = Conference;
L = Letters to the Editor
S = Summaries of Toxicological Data

Abdo K. M. 1043[C], 1091[C]
Ackroyd D. M. 497[C]
Acosta D. 551[C]
Adams K. 1111[C]
Addis P. B. 1021[C]
Aeschbacher M. 467[C]
Agius C. 591[C]
Ahmed I. 775[C]

INDEX OF SUBJECTS*

Acetic acid, methoxy- as major EGME metabolite, effects on Sertoli–germ cell cultures 655[C]

Acid Yellow 73, teratogenicity studies in rats and rabbits 819[P]

Acrylate, methyl, ethyl and butyl, long-term inhalation studies in rats and mice 264

Acrylonitrile, in drinking-water, induction of brain tumours in rats by 129[C]

Adriamycin, mechanism of selective nephrotoxicity to glomerular epithelium 775[C]

Aflatoxin, deposition in and clearance from tissues of laying hens 37[P] ... in mouldy Nigerian acha samples 339[P]

Aldrin, elimination kinetics in human milk 869[P]

Algae, book review on use as ecotoxicological indicators 67

Alginate, sodium, long-term feeding study in mice 825[P]

Allyl compounds, neurotoxic effects of industrial exposures to allyl chloride 439 ... SAR and prescreening test battery for genotoxicity of 667[C]

Aluminium, tissue retention in rats after discontinuation of oral exposure to 1331[P]

Amines (see also specific compounds), aromatic: book review on decontamination and destruction of, in laboratory wastes 256, comparison of activation to mutagens by human and rat liver 757[C]

Amino acid pyrolysates, DNA repair induction by Trp-P-1, Trp-P-2, Glu-P-1 and Glu-P-2 in rat and hamster hepatocytes 383[P] ... mutagenic activation by S-9 from human and rat liver 757[C]

2-Aminofluorene, and acetyl derivative, mutagenic activation by human and rat liver 757[C]

β-Aminopropionitrile, teratogenicity assay in cultured rat embryos 634[C]

Amygdalin, cyanide liberation from β-glucosidase hydrolysis of 417[P] ... metabolism of, and cyanide liberation from, in hamsters 417[P]

Analytical chemistry, book review on methods for volatile halogenated hydrocarbons and some metabolites 433

Aniline, 4,4′-methylenebis-2-chloro- and 4,4′-methylenedi-, routes of activation to bacterial mutagens 755[C]

Anisaldehyde, antimutagenic effects of 51[P]

Antioxidants (see also specific compounds), activities and mechanisms, study methods for 1007[C] ... carcinogenic action and modification of chemical carcinogenesis by 1071[C] ... EEC legislative approach to need for and safety of 1031[C] ... intake: in EEC 1031[C], of phenolic types in Canada 1035[C] ... phenolic: panel discussion on risk assessment of 1243[C], variable forestomach effects in short-term feeding studies in various species 1183[C] ... reactions in foods 1015[C] ... technological need for, in food industry 999[C], 1031[C] ... use in foods, quantitative data from industry surveys 1039[C]

Antipyrine, metabolism, kinetic studies in hepatocyte cultures 761[C]

Areca nut, IARC monograph (Vol. 37) on carcinogenicity relevant to chewing of 885

Asbestos, *in vitro* toxicity tests on, correlation with *in vivo* tumorigenicity 535[C]

Aspartame, effects on mast cells and basophils 171[P] ... serum methanol levels after oral dosing with, in rat and man 187[P]

Azo dyes, and hydrazone dyes, comparison of metabolism and mutagenicity in Ames test 165[P] ... mono-, poor *in vitro* assay distinction between carcinogen/non-carcinogen pair 707[C]

Bacteria, metabolic activity of hindgut microflora in continuous flow systems 743[C] ... quantitation of dye binding in characterization of eukaryote enterotoxins 589[C]

Benzoates, *n*-alkyl, as cosmetics preservatives, toxicity tests in epithelial cell line 477[C]

Benzo[*a*]pyrene, adsorbed onto particles, effects on bacterial mutagenicity and macrophage cytotoxicity tests 697[C]

Benzyl acetate, pharmacokinetics and metabolism in rats 1257[P], 1267[P]

Betel, IARC monograph (Vol. 37) on carcinogenicity relevant to chewing of 885 ... quid with tobacco: nitrosamines in saliva of chewers of 293[P], mutagenicity tests on musk ambrette and musk xylene in 27[P]

BHA (see Butylated hydroxyanisole)

BHT (see Butylated hydroxytoluene)

Bile acids, as possible colon cancer promoters, positive mutagenicity study on 360 ... increase in MNNG-induced forestomach tumours by 1111[C]

Biochemistry, clinical, book review on recently developed methods in 258

Biotechnology, book review on: developments in fermentation, food industry applications, enzymes, immunomodifiers, chromosome-linked human diseases and yeast genetics 436, patent law applied to 436

Blood book review on haemopoietic stem cells 255 ... *in vitro* studies of platelet aggregation 593[C]

2-Bromoethanamine, hydrobromide, mechanism of selective nephrotoxicity to medullary interstitial cells 775[C]

Butylated hydroxyanisole, and metabolites, mechanism and modification of forestomach tumorigenesis by 1071[C] ... case for integrated approach to risk assessment 1243[C] ... chemical reactions with foods 1015[C] ... early forestomach changes in rats treated with 1171[C], 1183[C] ... effects on hepatobiliary disposition and DNA binding of aflatoxin B_1 in rats 1273[P] ... epigenetic promoting effects of 1163[C] ... feeding study: in dogs (180 days), no oesophageal or stomach lesions in 1167[C], 1201[C], 1223[C], in pregnant pigs 1229[C], in rats/monkeys with/without BHT, levels accumulating in adipose tissue 1159[C], in rats (2-yr), forestomach hyperplasia and carcinoma in 1167[C] ... increase in MNNG-induced forestomach tumours by 1111[C] ... mechanisms of: anticarcinogenic effects of isomers of 1099[C], carcinogenicity of, panel discussion 1235[C] ... oral 12-wk study in monkeys 1197[C] ... species variations in metabolism 1145[C] ... toxicological implications of interaction with BHT 1189[C]

Butylated hydroxytoluene, chemical reactions with foods 1015[C] ... enhancement of antimutagenic activity of simple phenols by 881[P] ... feeding study: in mice, liver, lung and gut tumours in 1127[C], in rats/monkeys with BHA, levels accumulating in adipose tissue 1159[C], in rats (two generations), liver tumours in 7[P], 1121[C], 1167[C] ... hepatic responses to high doses in rats 1131[C] ... inhibition of DMBA mutagenicity by 704[C] ... interaction with other antioxidants and phenolics, toxicological implications of 1189[C] ... mechanism of rat forestomach tumour induction by 1149[C] ... modifying effects on chemical car-

*The significance of the superscripts P, R, C, L and S is given in paragraph 2 of the Index of Authors (p. *3*).

cinogenesis 1071[C] ... species variations in metabolism 1145[C]

2-*tert*-Butylhydroquinone, metabolism of 1145[C] ... review of toxicological data on 1063[C]

Cadmium, levels in human milk, correlation with environmental and food factors 913[P]

Caffeine, study of oral dosing effects on rat reproduction 277[P]

Calcium, carbonate, long-term implantation study in rat peritoneal cavity 425[P] ... disposition and excretion in female rats 283[P]

Carbon tetrachloride, effect of endrin on hepatotoxicity of, in rats 863[P]

Carcinogenesis, book review on: age-related factors in 990, Burkitt's lymphoma, as model for general principles of 357, evaluation of short-term tests for 65, incidence, epidemiology and types of cancer in Scotland 435, monitoring human exposure to carcinogenic agents 257, reviews of methods of testing for 257, role of chemicals and radiation in aetiology of 885, the cancer registry 991 ... gastric and oesophageal cancer, risk-inducing and protective factors in 1111[C] ... *in vitro* approaches to assessment of, lack of assays for gene amplification 657[C] ... limitations of: *in vitro* assays for distinguishing between carcinogen/non-carcinogen pairs of related compounds 707[C], Salmonella/uninduced S-9 or hepatocyte systems for pro-carcinogen assays 695[C], short-term genotoxicity assays and value of 663[C] ... mechanisms of chemical induction of forestomach tumours 1083[C] ... model tissue/cell culture systems for genotoxicity testing 675[C] ... report of Bangkok Workshop on occupational hazards 431[C] ... stomach cancer incidence and diet 437 ... symposium on brain-tumour induction in rat and man 75[C] ... systematic short-term test strategy for chemical carcinogens 685[C]

Carrageenan, role in complement activation 891[P]

Cell culture(s) (see also under Kidney, Liver, Nervous system, Skin), dye-binding test for acute toxicity, FRAME multicentre trial 457[C] ... fibroblasts: chemical toxicity tests in, using cell protein, neutral red uptake and morphology as endpoints 469[C], deoxynucleotide synthesis in, as model for cytotoxicity studies 813[C], neutral red uptake in, as screen for eye irritancy 473[C] toxicity screen in, using ATP endpoint 465[C] ... multiple toxicity test system in neuroblastoma, brain, muscle, heart and liver cell cultures 567[C] ... perifusion technique in mast cell and macrophage studies 521[C] ... rapid cytotoxicity assay based on dye retention/exclusion in thymocytes 467[C] ... thyrotoxicity studies in pig and rat thyroid cells 557[C] ... toxicity tests of inhalable materials, in pulmonary epithelial cell line 527[C] ... use in tests for skin irritation and hypersensitivity 481[C]

Celluclast®, derived from *Trichoderma reesei*, toxicity, teratogenicity, mutagenicity, irritancy and skin sensitization potential of 55[S]

Chinese Restaurant Syndrome, no confirmation for role of monosodium glutamate in 351[R]

Chloroform, review of carcinogenicity studies on 359

Cholesterol, oxidation products, cytotoxic and mutagenic properties of 1103[C]

Citreoviridin, teratogenicity study in mice 1315[P]

Cocoa powder, feeding study of perinatal/postnatal effects in rats 375[P] ... teratogenicity study: in rabbits 363[P], in rats 375[P]

Coffee, book review on botany, biochemistry and production 433 ... instant and home-brew, mutagenicity assays in Drosophila 835[P]

Cosmetics, total protein of epithelial cell line as endpoint in toxicity tests on 477[C]

Cyanoacetic acid, teratogenicity assay in cultured rat embryos 634[C]

Cyclophosphamide, role of metabolism in teratogenic activity of 737[C]

Cytotoxicity, *in vitro* studies of mechanisms of 769[C] ... mouse fibroblast deoxynucleotide synthesis as model for studies of 813[C]

D & C Yellow No. 8, teratogenicity studies in rats and rabbits 819[P]

DDE, elimination kinetics in human milk 869[P]

DDT, acute toxicity to fish cells *in vitro* 591[C]

Dentistry, restorative materials for, model cavity method for toxicity testing of 592[C]

Deoxynivalenol, 15-acetyl- in diet, effects on feed consumption and body weight in mice 1309[P] ... and acetyl derivative, *in vitro* effects on immune system 545[C] ... feeding and gavage studies (5–18 wk) in rats and mice 213[P], 935[P] ... in mouldy Nigerian acha samples 339[P] ... teratogenicity study in rabbits 421[P]

Detergents (see under Surface-active agents)

Diazepam, metabolism, kinetic studies in hepatocyte cultures 761[C]

Dibenzo-*p*-dioxin, halogenated series, as photoaffinity labels for Ah receptor 781[C]

Dibromosulphthalein, hepatic transport of, in perfused rat liver 765[C]

Dibunol (see Butylated hydroxytoluene)

2,6-Di-*tert*-butyl-4-methylphenol (see Butylated hydroxytoluene)

Dichloromethane, metabolism and subchronic oral toxicity in rats and mice 943[P] ... tissue distribution and metabolism after iv or oral administration: in mice 965[P], in rats 975[P] ... 2-yr drinking-water study: in mice 959[P], in rats 951[P]

Dieldrin, HCE analogue, comparison of metabolism *in vivo* (rat) and in isolated hepatocytes 767[C]

Diethylene glycol, review of short- and long-term toxicity of 261

Diethylstilboestrol, differing sensitivities to, in subpopulations of an inbred mouse strain 931[P]

7,12-Dimethylbenz(*a*)anthracene, BHT inhibition of mutagenic activity of 704[C]

Diphenylhydantoin, role of metabolism in teratogenic activity of 737[C]

Disperse Blue 1, effect of dietary administration on rat urinary system 269[P]

Dithiolthiones, biochemical effects of intragastric or dietary administration to mice and rats 405[P]

Drugs, antimycotic, teratogenicity assays in cultured rat embryos 641[C] ... corticosteroid effects on collagen synthesis in human skin fibroblasts 587[C] ... cytostatic and cytotoxic properties of H200/68 in primary brain, muscle, heart and liver cells 567[C] ... Hong assay for effects on sperm motility 633[C] ... *in vitro* techniques for assessing membrane-stabilizing activity 807[C] ... mutagenicity studies of antihistamines, their metabolites and nitrosation products 981[P]

Ecotoxicity, book review on use of algae in tests for 67

Endrin, and derivatives, effects on carbon tetrachloride hepatotoxicity and hepatobiliary function in rats 863[P]

Enzymes, acid cellulase from *Trichoderma reesei*, safety evaluation of 55[S] ... activities in rat hepatocyte cultures 758[C], 759[C] ... DT-diaphorase, dietary influences on rat hepatic and intestinal activity of 851[P] ... flavonoid inhibition of rat microsomal ethoxycoumarin deethylase 857[P] ... inhibition of lactate dehydrogenase by sulphite in perfused rat liver 201[P] ... skin tests on alcalase-containing washing powder 264 ... zinc- and copper-containing, inhibition by food constituents with metal-chelating sites 897[P]

Ethanol, as promoter in diethylnitrosamine-initiated rat liver tumours 241[P] ... penetration through excised guinea-pig skin 305[P] ... suggested non-oxidative mechanism of toxicity to non-liver tissues 438
Ethylene, metabolism to ethylene oxide, significance for carcinogenic hazard of 70
Ethylene glycol monomethyl ether, testicular effects of single oral dose of 655[C]
Ethylene oxide, brain tumour induction by, in rats 145[C]
Ethylvanillin, antimutagenic effects of 51
Eugenol, from betel leaf, antimutagenic activity of 1321[P] ... toxicological implications of interaction with BHT 1189[C]
Eye, as Draize test alternative: hen's egg–CAM test 495[C], 497[C], 503[C], neutral red uptake by mouse fibroblasts 473[C]

Fats/oils, lipid oxidation products in foods 1021[C] ... olive oil as fatty-food simulant in global migration studies of plastic packaging materials 23[P] ... refined vegetable oils, lack of oestrogen-like activity in commercial samples 251[P]
FD & C Blue No. 2, multigeneration feeding study in rats 159[P]
Ferulic acid, toxicological implications of interaction with BHT 1189[C]
Flavonoids, flavones, flavonols and reduced homologues as inhibitors of rat microsomal ethoxycoumarin deethylase 857[P]
Flavourings (see also specific flavourings), antimutagenic potential of, in tests in *E. coli* and *S. typhimurium* 51[P]
Fluoride, levels in human milk, correlation with environmental and food factors 913[P] ... sodium, effects on membrane permeability and brush border enzymes in rat intestine 33[P]
Fluorinated hydrocarbons, cytogenicity, dominant lethal and 2-yr inhalation studies of hydrochlorofluorocarbon 142b 237[P]
Food (see also Food packaging, Food processing and specific types of food), antioxidant usage in: chemical reactions resulting from 1015[C], quantitative data from industry surveys on 1039[C], technological need for 999[C], 1031[C] ... book review on: biotechnology applications in industry 436, genetic toxicology of dietary components 989, interpretation of RCP/BNF report on intolerance to 989 ... diet and stomach cancer incidence 437 ... dietary influences on DT-diaphorase activity in rats 851[P] ... lipid oxidation products in 1021[C] ... metalloenzyme inactivation by constituents of 897[P] ... mutagens from cooked protein: activation by S-9 from human and rat liver 757[C], DNA-repair induction by, in rat and hamster hepatocytes 383[P] ... report of London study on possible overactivity due to components of 69
Food packaging (see also specific materials), global migration of plastics components into olive oil and isooctane 23[P]
Food processing, Maillard browning products, mutagen formation in reaction of nitrite with 1303[P] ... mutagen generation by chlorination of poultry chiller water 923[P]
Formamide, *N*-methyl-, relationship of *in vitro* covalent binding to hepatotoxicity of 814[C]
Fungal toxins (see also specific toxins), book review on classification, formation, analysis and significance of 356
Fungi, screening of Nigerian mouldy acha for 339[P] ... *Trichoderma reesei,* toxicity and pathogenicity studies on 55[S]
Fungicides, book review on development of resistance to 255

Gallic acid, esters, metabolism of 1145[C] ... propyl ester, chronic toxicity/carcinogenicity studies in mice and rats 1091[C] ... propyl, octyl and dodecyl esters, review of toxicology of 1067[C]
Gentamicin, binding and uptake in renal tubule fragments and cortical slices 595[C] ... derivatives, *in vitro* aminoglycoside–phospholipid interactions and nephrotoxicity of 815[C] ... nephrotoxicity studies in brush border membrane model 804[C]
Glass fibre, *in vitro* toxicity tests on, correlation with *in vivo* effects 535[C]
Glutamic acid, monosodium salt, no confirmation of role in Chinese Restaurant Syndrome in double-blind and epidemiology studies 351[R]
Glutethimide, and amino-, thyrotoxicity study in pig and rat thyroid cell cultures 557[C]
Glycerol formal, cardiovascular malformations induced in cultured rat embryos by 639[C]
Griseofulvin, teratogenicity study in cultured rat embryos 641[C]
Guaiacol, toxicological implications of interaction with BHT 1189[C]
Gut, book review on: intestinal microbiology 355, relations between dietary habits and function of 355 ... stomach cancer incidence and diet 437

Halogenated hydrocarbons (see also specific compounds), alkanes and alkenes and oxygenated derivatives, book review on analytical methods for 433
Heart, rat, isolated perfused system for cardiotoxicity screening 597[C]
Heptachlor, and heptachlor epoxide, elimination kinetics in human milk 869[P]
Herbs, effects of extracts of, on hepatic metabolism systems of mice 903[P]
Hexabromobenzene, excretion of porphyrins and precursors by rats treated orally with 325[P]
Hexachlorobutadiene, *N*-acetylcysteine conjugate of, mechanism of selective nephrotoxicity to proximal tubules 775[C] ... metabolism and toxicity studies *in vitro* 769[C]
Hydrazone dyes, based on tetramethylbenzidine/diethyl malonate metabolism and mutagenesis in Ames test 165[P]
Hydrogen peroxide, phagocyte-derived, influence on tissue reponse to tumour promoters and irritants 681[C]
Hydroxychavicol, from betel leaf, antimutagenic activity of 1321[P]
Hydroxyurea, changes in deoxynucleotide metabolism in mouse fibroblasts by 813[C]
Hypochlorite, sodium, drinking-water carcinogenicity study in rats 1295[P]

Imidazo[4,5-*f*]quinoline, amino(di)methyl-: DNA-repair induction by, in rat and hamster hepatocytes 383[P], mutagenic activation by S-9 from human and rat liver 757[C]
Imidazo[4,5-*f*]quinoxaline, aminodimethyl-, DNA-repair induction by, in rat and hamster hepatocytes 383[P]
Immunology, book review on: role of major histocompatibility complex (MHC) and molecular biology of MHC genes 67, toxicity of xenobiotics to immune system 989
Indigo carmine, multigeneration feeding study in rats 159[P]
Industrial hazards, book review on: handbook of health and chemical safety data 65, promotion of health and safety in chemical laboratories 886
Inflammation, book review on: mechanisms of, and developments in treatment 356, specific mediators in 991
Insecticides (see also specific compounds/formulations), book review on developments in biochemistry and toxicology of 886 ... metabolism of major classes of, in poultry and livestock 255

International Agency for Research on Cancer, monographs on carcinogenic risk of: polynuclear aromatics in bitumens, coaltars, shale oils and soots (Vol. 35/4) 256, tobacco habits (non-smoking), betel and areca chewing and related nitrosamines (Vol. 37) 885
Isooctane, as fatty-food simulant in global migration studies of plastic packaging materials 23[P]

Kanamycin A, derivatives, *in vitro* aminoglycoside–phospholipid interactions and nephrotoxicity of 815[C]
Kathon, biocide, absorption and disposition in rats treated iv or dermally with 43[P]
Ketoconazole, teratogenicity study in cultured rat embryos 641[C]
Kidney, book review on nephrotoxicity symposium proceedings 66 ... brush-border membrane model for studying mechanisms of nephrotoxicity 804[C] ... comparison of tubule fragments and cortical slices in gentamicin nephrotoxicity studies 595[C] ... cortical cell cultures in nephrotoxicity tests 551[C] ... mechanism of diet-induced nephrocalcinosis in female rats 283[P] ... mechanisms of target cell injury by nephrotoxins 775[C]

Laboratory animals, brain-tumour incidence: in mice 105[C], in rats 113[C], problems of evaluation in long-term rat studies 139[C], 145[C], 155[C] ... comparison of gut pH levels, nitrate reduction and nitrosamine formation in germ-free, gnotobiotic and conventional rats 17[P] ... differing sensitivities to diethylstilboestrol in subpopulations of an inbred mouse strain 931[P]
Lactose, long-term feeding study in mice 825[P]
Lathyrism, teratogenicity of BAPN and metabolite in cultured rat embryos 634[C]
Lead, levels in human milk, correlation with environmental and food factors 913[P]
Lignocaine, effects on cultured mouse peritoneal macrophages 525[C]
Linamarin, cyanide liberation from β-glucosidase hydrolysis of 417[P] ... metabolism of, and cyanide liberation from, in hamsters 417[P]
Lindane, elimination kinetics in human milk 869[P]
Liver, rat hepatocyte cultures: and adult human hepatocytes, comparative stability of 577[C], conjugation reactions in 758[C], cytochrome *P*-450 and MFO activities in 759[C], drug metabolism kinetics in 761[C], factors affecting DNA and protein content of 571[C], mitogenicity of peroxisome proliferators 709[C], tests for hepatotoxicity in 569[C], 576[C] ... rat, storage before enzymic perfusion for hepatocyte isolation 579[C] ... slices and hepatocytes, permeability studies with EDTA in 801[C]
Lubricants, for surgical gloves, long-term implantation studies in rat peritoneal cavity 425[P]
Lysinoalanine, studies of carboxypeptidase A and tyrosinase inhibition by 897[P]

Mannitol, chronic toxicity/carcinogenicity studies in mice and rats 1091[C]
Masheri, nitrosamines in saliva of chewers of 293[P]
Meat, effects of vegetable juices on mutagenicity of nitrosated or non-nitrosated beef extract 847[P]
Menadione, metabolism and toxicity studies *in vitro* 769[C]
Metabolism, activity of hindgut microflora in continuous flow systems 743[C] ... (in)activation systems in short-term *in vitro* carcinogenicity tests 721[C] ... inducible cytochromes in differentiating rat embryo cells 737[C] ... kinetic studies of drug metabolism in hepatocyte cultures 761[C] ... use of pharmacokinetics in integration of *in vivo* and *in vitro* studies 711[C]
Methanol, levels in serum after oral dose of aspartame to rat or man 187[P] ... penetration through excised guinea-pig skin 305[P]
Methapyrilene, and related antihistamines, metabolites and nitrosation products, mutagenicity (Ames) tests on 981[P]
2-Methyl-4-isothiazolin-3-one, and 5-chloro-derivative, absorption and disposition in rats treated iv or dermally 43[P]
1-Methyl-1,2,3,4-tetrahydro-β-carboline-3-carboxylic acid, as mutagen precursor in soy sauce, nitrosation by high levels of nitrite 13[P]
Milk, heat-processed, mutagenicity (Ames) tests on 987[P]
Mineral dusts (see also specific materials), *in vitro* toxicity studies and correlation with *in vivo* tumorigenicity 535[C]
Mould-release agents, long-term implantation studies in rat peritoneal cavity 425[P]
Musk ambrette, in chewing tobacco and betel quid, occurrence and (Ames) mutagenicity of 27[P]
Musk xylene, in chewing tobacco and betel quid, occurrence and (Ames) mutagenicity tests on 27[P]
Mutagenesis, automation of mammalian gene mutation assay 699[C] ... book review on: evaluation of short-term tests for carcinogenicity 65, monitoring human exposure to mutagenic agents 257, UKEMS collaborative testing study report 355 ... expression of bacterial luminescence genes in response to DNA damage 710[C] ... flow cytometry method for detecting spindle poisons and clastogens in cell cultures 702[C] ... information systems for use in genetic toxicology 703[C] ... limitations of Salmonella/uninduced S-9 or hepatocyte systems for pro-carcinogen assays 695[C]

Naftifine, teratogenicity study in cultured rat embryos 641[C]
Nalidixic acid, long-term carcinogenicity study in mice 319[P]
Nervous system, brain-tumour induction: by acrylonitrile 129[C], by nitrosourea 121[C], evaluation in long-term rat studies 139[C], 145[C], 155[C] ... brain tumours in man: chemicals as causative agents 99[C], classification and occurrence 91[C], 99[C] ... development of human brain 79[C] ... foetal rat brain reaggregate cultures in neurotoxicity studies 583[C] ... *in vitro* models for hypothalamic–pituitary system 811[C] ... mouse dorsal root ganglia cultures in neurotoxicity screening 581[C] ... multiple toxicity test system using brain and other cell cultures 567[C] ... neurotoxicity screening in foetal explants of mouse sensory and neuromuscular tissues 539[C] ... types and occurrence of brain tumours: in mice 105[C], in rats 113[C]
Nitrate, reduction in germ-free, gnotobiotic and conventional rats 17[P]
Nitrilotriacetate, trisodium, effect of *N*-nitroso-*n*-butyl-(4-hydroxybutyl)amine on alterations to urine and bladder mineral concentrations induced by 229[P]
Nitrite, in soy sauce, relation of concentration to mutagen formation 13[P]
4-Nitrobiphenyl, book review on decontamination and destruction of, in laboratory wastes 256
Nitrosamine(s), basal nitrosoproline formation and excretion in ferret 843[P] ... dose-response study of diethylnitrosamine initiation of rat-liver tumours, with phenobarbital or ethanol promotion 241[P] ... in saliva of tobacco chewers and masheri users 293[P] ... in tobacco, IARC monograph (Vol. 37) on carcinogenic risks of 885 ... *N*-nitroso-*n*-butyl-(4-hydroxybutyl)amine effects on mineral disposition changes due to nitrilotriacetate 229[P] ... *N*-nitrosoproline, rates of formation in germ-free, gnotobiotic and conventional rats 17[P]
Nitrosomethylurea, determination in biological fluids by 4-nitrothiophenol reaction and HPLC 247[P]

N-Nitrosopeptides, acetylprolyl- and acetylvalyl-nitrosoglycines, mutagenicity tests in Chinese hamster ovary cells 289[P]
Nitrosourea, induction of brain tumours by 121[C]

Ochratoxin, A, not detected in mouldy acha samples 339[P]
Oestrogens, lack of activity similar to, in commercially refined vegetable oils 251[P]... quantitative *in vitro* assay for potency of 615[C]
Oils (see Fats/oils)
Organochlorine insecticides (see specific compounds)
Organotin compounds (see under Tin)

Paraben, methyl-, toxicological implications of interaction with BHT 1189[C]
Paracetamol, toxicity studies in freshly isolated hepatocytes 731[C]
Pathology, and histology, book review on handbook of techniques in 258
Perfluorooctanoate, ammonium, inhalation toxicity study of 1325[P]
Peroxisomes, mitogenicity of peroxisome proliferators in hepatocyte monolayers 709[C]
Pesticides (see also specific types and compounds), book review on biotransformation studies 255
Pharmacokinetics, role of, in integrating *in vivo* and *in vitro* toxicity study results 711[C]
Phenobarbital, as promoter in diethylnitrosamine-initiated rat liver tumours 241[P]
Phenol, possible health effects of contamination of chlorinated public water supply with 263
Phenylenediamine, *N,N*-bis-(2-hydroxyethyl)-*p*-, subchronic toxicity, teratogenicity and dominant lethal studies in rats 875[P]
Phenylethylaminoalanine, studies of carboxypeptidase A and tyrosinase inhibition by 897[P]
***o*-Phenylphenate,** sodium, thiabendazole enhancement of bladder tumour induction by 207[P]
Phosphorus, disposition and excretion in female rats, variation with dietary calcium levels 283[P]
Phototoxicity, tests for, in mammalian cell cultures 789[C]
Phthalic acid, di-*n*-pentyl ester, testicular effects of single oral dose of 655[C]... mono-(2-ethylhexyl) ester: effects on Sertoli–germ cell cultures 655[C], comparison of peroxisomal effects in Chinese and Syrian hamster livers and hepatocytes 573[C]... monoisononyl, monoisodecyl and diisononyl esters, species differences in cultured hepatocyte responses to 799[C]
Phytic acid, sodium salt, studies of carboxypeptidase A and tyrosinase inhibition by 897[P]
Polychlorinated biphenyls, *in vitro* study of *in vivo* lung accumulation of 4,4′-bis(methylsulphonyl)-2,2′,5,5′-tetrachlorobiphenyl 563[C]
Polyether–polyamide copolymer, global migration of components into olive oil and isooctane 23[P]
Polyurethane, global migration of components into olive oil and isooctane 23[P]
Polyvinyl chloride, phthalate-plasticized, global migration of components into olive oil and isooctane 23[P]
Porphyrins, and precursors, excretion by rats treated with hexabromobenzene 325[P]
Procarbazine, *in vitro* genotoxicity of, in mammalian cells 705[C]
Prunasin, cyanide liberation from β-glucosidase hydrolysis of 417[P]
Pyrido[1,2-*a*:3′,2′-*d*]imidazoles, DNA repair induction by Glu-P-1 and Glu-P-2 in rat and hamster hepatocytes 383[P]... mutagenic activation of Glu-P-1 and Glu-P-2 by S-9 from human and rat liver 757[C]
Pyrido[4,3-*b*]indoles, DNA repair induction by Trp-P-1 and Trp-P-2 in rat and hamster hepatocytes 383[P]... mutagenic activation of Trp-P-1 and Trp-P-2 by S-9 from human and rat liver 757[C]
Pyrogallol, antimutagenic activity to benzopyrene increased by BHT 881[P]
Pyrogens, book review on generation, biological properties and methods of testing for 434
Pyrroles, 2-substituted, mutagen formation in reaction of nitrite with 1303[P]

Quaternary ammonium compounds, use of cell perifusion technique to study cetyltrimethylammonium chloride cytolysis in peritoneal mast cells 521[C]

Reproductive system (see also Teratogenesis), book review on toxicology of 256... gamete and embryo cultures in assays of toxic effects on germ-cell function and development potential 607[C]... giant yolk sac model for studies of transport across rodent yolk-sac placenta 645[C]... Hong assay of drug effects on sperm motility 633[C]... Sertoli–germ cell co-cultures as model system for toxicity to 601[C]
Resorcinol, antimutagenic activity to benzopyrene increased by BHT 881[P]
Ricin, effects of carbohydrate modification on cytotoxicity to liver cells 803[C]

Silicone rubber, global migration of components into olive oil and isooctane 23[P]
Skin, dermatotoxicity tests in: human epidermal cells 519[C], rat differentiating keratinocyte cultures 693[C]... epithelial cell line used in cosmetics testing with total protein endpoint 477[C]... excised human and monkey skin, factors affecting penetration of T-2 toxin through 221[P]... fibroblasts from human skin, corticosteroid effect on collagen synthesis in 587[C]... irritancy test system in mouse fibroblasts and epithelial cell line 517[C]... percutaneous absorption studies *in vitro* 749[C], 763[C]... rat epidermal slice corrosivity test 507[C], 513[C]... Relative Alkylation Index as quantitative model for allergic contact dermatitis 795[C]... sensitization, murine local lymph node assay for 585[C]... slices, irritation and hypersensitivity testing *in vitro* 481[C]
Solvents (see also specific compounds), aromatic and aliphatic, effects on red cell acetylcholinesterase activity *in vitro* 805[C]
Sorbitol, effects of long-term oral administration as alternative energy source in mice 389[P]... 3-generation dietary reproduction study in rats 191[P]... ingestion, effects on renal calcium oxalate deposition in ethylene glycol-treated rats 397[P]
Soy sauce, nitrosation of methyltetrahydro-β-carboline-3-carboxylic acid by high nitrite levels in 13[P]
Starch, modified, long-term feeding study on hydroxypropyl distarch phosphate and starch acetate in mice 825[P]... powder, long-term implantation study in rat peritoneal cavity 425[P]
Statistics, book review on: methods for cancer studies 66, methods used for pharmaceutical testing, clinical trial data, quality control and consumer testing 66
Sucrose octa-isobutyrate, disposition and excretion in rats, dogs and monkeys 1287[P]
Sugars, refined, effects of: ingestion on renal calcium oxalate deposition in ethylene glycol-treated rats 397[P], long-term oral administration as alternative energy source in mice 389[P]
Sulphite, inhibition of lactate dehydrogenase activity by, in perfused rat liver 201[P]
Sulphonamides, formation of triazenes from nitrite and 299[P]

Superoxide, and other radicals, effects on rat embryos in culture 637[C] ... phagocyte-derived, influence on tissue responses to tumour promoters and irritants 681[C]
Surface-active agents, anionic, subchronic oral toxicity test in rats on liquid detergent containing 175[P] ... skin tests on alcalase-containing washing powder 264

Talc, long-term implantation study in rat peritoneal cavity 425[P] ... no measurable transfer from vagina to uterus in monkeys 329[P]
Teratogenesis, combined use of rat-embryo mid-brain and limb cells in studies of 627[C] ... *in vivo*/*in vitro* rat embryo studies on anti-yolk sac antibody 643[C] ... metabolism of teratogens by differentiating rat embryo cells 737[C] ... SAR for teratogenic hazard determined in cultured rat-embryo limb cells 649[C] ... use of: cultured rat embryos in studies of 619[C], 623[C], 634[C], 635[C], 637[C], 639[C], 641[C], 643[C], 644[C], hydra assay as pre-screen for 651[C]
Terbinafine, teratogenicity study in cultured rat embryos 641[C]
1,4,5,8-Tetraaminoanthraquinone (see Disperse Blue 1)
Thalidomide, teratogenicity in cultured rat embryos 635[C]
Theobromine, teratogenicity study: in rabbits 363[P], in rats 375[P]
Thiabendazole, enhancement of *o*-phenylphenate-induced bladder tumour production by 207[P] ... irreversible binding of, to pregnant-mouse tissue protein *in vivo* and *in vitro* 1283[P]
Tin, trialkyl- and triphenyltin cytotoxicity to rat thymocytes 599[C]
Tobacco, and betel quid chewers, nitrosamines in saliva of 293[P] ... chewing, mutagenicity tests on musk ambrette and musk xylene in 27[P] ... IARC monograph (Vol. 37) on carcinogenicity relevant to non-smoking use of 885
Tocopherols, as food additives, safety assessment of 1051[C] ... 13-wk toxicity study of *d*-α-tocopheryl acetate (vitamin E) in F344 rats 1043[C]
Toxicity testing (see also under Carcinogenesis, Cell culture(s), Mutagenesis, Teratogenesis and specific organs or systems), development and validation of *in vitro* alternative assays 449–527[C] ... of restorative dental materials, model cavity method for 592[C] ... sugar solutions as alternative energy source in dietary self-selection model 389[P] ... uses of hen's egg tests in 647[C]
Toxicology, book review on: effects of poisonous plants on livestock 434, molecular aspects of 434 ... examples of unpredictability in, BIBRA ASM address 343[R] ... genetic, information systems used in 703[C] ... report of Bangkok Workshop on environmental toxicity and carcinogenesis 431[C] ... reproductive, book review on 256 ... role of pharmacokinetics in integrating *in vivo* and *in vitro* results 711[C]
Triazenes, formation from sodium nitrite and sulphonamides 299[P]
Triazoles, mono- and bis-, SAR for *in vitro* micromass teratogenicity test 649[C]
Trifluoroethanol, and oxidative metabolites, comparison of *in vivo* and *in vitro* effects in rat testis 653[C]
T-2 toxin, changes induced in erythrocyte membrane by 311[P] ... factors affecting penetration through excised human and monkey skin 221[P]

Vanillin, antimutagenic effects of 51[P] ... toxicological implications of interaction with BHT 1189[C]
Vegetable(s), cruciferous: biochemical effects of dithiolthione constituents in rats and mice 405[P], effects of Brussels sprouts extract on hepatic metabolism systems of mice 903[P] ... juices, effects on mutagenicity of nitrosated or non-nitrosated beef extract 847[P]
Vitamin E (see under Tocopherols)
Vomitoxin (see Deoxynivalenol)

Water, for poultry chilling, potential generation of mutagens by chlorination of 923[P]

Xanthine, and xanthine oxidase, teratogenic effects of generated superoxide radicals on cultured rat embryos 637[C]
Xylitol, effects of long-term oral administration as alternative energy source in mice 389[P] ... ingestion, effects on renal calcium oxalate deposition in ethylene glycol-treated rats 397[P]

Zearalenone, in mouldy Nigerian acha samples 339[P]
Zinc, deficiency, enhancement of chemical induction of oesophageal tumours by 1111[C]

Printed in Great Britain by A. Wheaton & Co. Ltd, Exeter
